

CHEMISTRY 23-04-2020

Class 7 C&D

1. Read the remaining chapter
2. Do question 11,12 and 13

HISTORY 24-04-2020

Chapter- 1

1. Read the chapter and learn the facts.
2. C. Multiple choice questions.
3. D. Answer in brief.
4. E. Answer in detail.

Write down the given assignment in your Notebook.

PHYSICS 24-04-2020

Ques. 1. Explain in your own words what is measurement?

Ques. 2. Explain when we measure mass on moon and earth it is same, but when we measure weight on moon and earth it is not same why?

Ques. 3. When we take a spherical ball and crush it into powder, what remains same area or volume? Also explain on crushing the spherical ball into powder what increases area or volume?

Ques. 4. If volume is the space occupied by a substance, how would you measure the volume of a stone using a measuring cylinder, beaker and water?

Ques. 5. If the formula of density is

$$\text{DENSITY} = \text{MASS}/\text{VOLUME}$$

how would you observe density as per mass?

Ques. 6. The formula of speed of a substance is

$$\text{SPEED} = \text{DISTANCE}/\text{TIME}$$

in reference to above formula explain what do you mean by the statement when we say

"Speed of A is greater than speed of B"?

Also derive the unit of speed using above formula?

Ques. 7. Area is the space occupied by a surface of a body-

Formula of area of a square is side*side

How would you determine the area of a body with no defined shape?

Hint: Explain in terms of using a graph paper.

GEOGRAPHY 25-04-2020

1- Read the chapter-1

2- Complete exercise D, E and F in your note book.

ENGLISH LANGUAGE 25-04-2020

Notice Writing

1- Write given notices in your notebook. (fair or rough according to convenience)
